

## ACCESSORIES FOR NEPATA WINDING AND SLITTING SOLUTIONS

### CONVERTPLUS2 SOFTWARE WITH ERP SYSTEM/INTERFACE

ConvertPlus2 Software for the integration of UA machines into your logistics process and your merchandise management system. The software has an AutoImport interface for reading delivery notes and product data. It can handle input from bar code scanners and provide custom-designed labels via a label printer. It is possible to create manual cutting jobs, process delivery notes in sequence or optimize production orders over multiple delivery notes.

## RECOMMENDED ACCESSORIES

### COMPLETE COMPUTER PERIPHERY FOR UA MACHINES

PC with touch screen, full HD resolution, pre-configured COM port (RS 485), networking, etc. Delivered pre-mounted to a sturdy ergonomic 3D pivot arm with swivel and tilt function and integrated cable routing. Direct thermal label printer / thermal transfer label printer including dispensing edge, maximum print width 104mm; Interfaces: USB, parallel, serial. Max. roll size 125mm diameter, resolution 203dpi. Delivery includes machine holder for all UA models. Modern 1D and 2D scanner gun for industrial use, USB interface. Delivery includes machine holder for all UA models.

### 2" TENSION CHUCKS AND SHAFTS

Tension shaft adapter for cardboard tubes with 2" inner diameter. The tension shafts can be quickly replaced, allowing for alternate use with the 3" elements included in the standard scope of delivery (also separately for winding and unwinding).

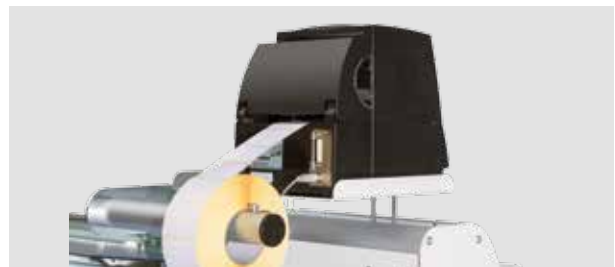

### STOP WASHER

Stop washers with matching maximum diameters for the purpose of winding and unwinding are available for rolls with a particularly large diameter. The washers are simply plugged on top of the clamping spigot and can be removed at any time. Variants for 2" and 3" clamping spigots are available.

### TRAY FOR KEYBOARD AND MOUSE ON 3D PIVOT ARM

Practical storage space for a standard PC keyboard with mouse for mounting on a UA series machine, incl. 3D pivot arm. White powder-coated sheet metal. Hole for cable passage.

### LARGE ROLL HOLDER FOR LABEL PRINTERS

Roll holder at the inner side of the case for the accommodation of large rolls for labels. Can be retrofitted to all UA machines.

## RECOMMENDED ACCESSORIES

### AUTOMATIC TAPE DISPENSER FOR PRINTER HOLDER

Automatic masking tape dispenser for mounting on the printer holder of a UA series machine.

### MANUAL TAPE DISPENSER WITH BASE

Manual masking tape dispenser for mounting on the printer holder or on the slitting head of a UA series machine via a special socket.

### DOCUMENT STORAGE DIN A4

Document storage for archiving of processed slips or other documents. Magnetic holder for the front panel of a UA machine.

### SET OF TRANSPORT ROLLS

To facilitate comfortable moving of a UA series machine, we offer a set of transport rolls with matching sockets for mounting on the machine body.

### RETAINING MAGNETS

Practical retaining magnets for attaching documents, such as delivery notes, on a UA machine's front panel. Helps keep your hands free for scanning and operating the machine.

### SLITTING BLADE

Slitting blade for mounting on the 1900 ADW, 1900 ADWS, UA 1650 ADW and UA1 650 ADWS slitting unit. HSS blade, 297mm diameter, 2.5mm thick. Single-sided sharpening.

## SERVICES

### INSTALLATION AND COMMISSIONING

Delivery and on-site installation of a UA series machine, connection of PC and possibly additional components (if included in the scope of performance of NEPATA GmbH) as well as installation and configuration of the software. Calibration and commissioning.

### STAFF TRAINING

Intensive training of employees on site, instruction of all production modes and possible troubleshooting, use of the ConvertPlus2 software, working with real delivery notes in the actual working environment, duration depends on the number of participants and individual agreement of the scope of training.

### SERVICE CASE

The most important mechanical and electronics spare parts as well as necessary special tools for self-repair, only recommended upon completion of technical training. The case is stored at your location and replenished after using a spare part.

### MACHINE MAINTENANCE

One of our technicians can perform on-site maintenance on a UA machine and, if necessary, replace parts. During maintenance, the machine is checked completely. If necessary, firmware updates are performed.

### TECHNICAL TRAINING (AT OUR LOCATION)

We introduce your technicians to the technical details of the UA machines at our premises. In addition to the design of mechanics and electronics, possible error scenarios are covered and disassembly and reassembly of individual components is practiced. .

## CONSUMABLES

### SLITTING SLEEVE

White slitting tubes for the pivot shaft of a 1900 ADW, 1900 ADWS, UA1650 ADW or UA1650 ADWS.

### SILICONE CLAMPING ELEMENT

Blue clamping element made of silicone for all UA machines. The clamping elements are easy to replace. Regular replacement is recommended to ensure secure clamping.

### SPARE BLADES

10 piece trapezoidal replacement blades for the cross-cutter of all UA series machines in a stable plastic case.

### REMOVABLE LABELS

Labels for thermal transfer and direct thermal printing, different dimensions, economy role with 3,000 labels - suitable for the large roll holder. Removable adhesive, white base color.
